# ONE Program REDCap Training Guide

## Introduction

Welcome to One Program! One Program is using the REDCap secure web application for data collection. It allows for multiple ways to collect data and provide real time reporting. Your pharmacy has the option of allowing patients to complete the [Patient Intake Form](#) online (using their phone, other handheld device, or computer) or via [paper form](#) that pharmacy staff will later need to enter into REDCap. Pharmacy staff will also complete the [Outcomes Worksheet](#) within REDCap either online in real time or retrospectively using the [paper version](#). Thank you for your participation in this valuable project to proactively help patients and communities by providing resources to pharmacists to educate about opioid misuse and accidental overdose.

## Support

[Training modules](#) providing an overview of REDCap are available on the [ONE Program website](#).

For questions on REDCap data entry please contact Jayme Steig ([jayme.steig@ndsu.edu](mailto:jayme.steig@ndsu.edu), 701.231.1878.)

For technical questions related to access REDCap (password resets, firewall issues, etc) please contact Jon Gardner ([jgardner@qualityhealthnd.org](mailto:jgardner@qualityhealthnd.org), 701.989.6237).

## Getting Started

### Enrolling Pharmacy

Pharmacies interested in participating in program should complete the online [enrollment application](#). Within 7 days of enrollment submission, your pharmacy's REDCap login and password will be emailed to the email address provided on the enrollment application. Please check your email for message from [redcap@qualityhealthnd.org](mailto:redcap@qualityhealthnd.org) for REDCap login information. Please add this email to your safe list to prevent it from being routed to "junk" folder. You email will receive two e-mails:

1. REDCap access granted –contains your username along with a link and directions to set your password. Usernames and passwords are at pharmacy level. Please set accordingly.
2. REDCap project approved – confirms your REDCap account and provides additional project information.

### REDCap Login

The address to login to the REDCap secure web application is <https://redcap.qualityhealthnd.org>. Username and password will be at pharmacy level. It is your responsibility to follow your pharmacy's security guidelines regarding use of logins and passwords. Passwords can be reset under [My Profile](#).

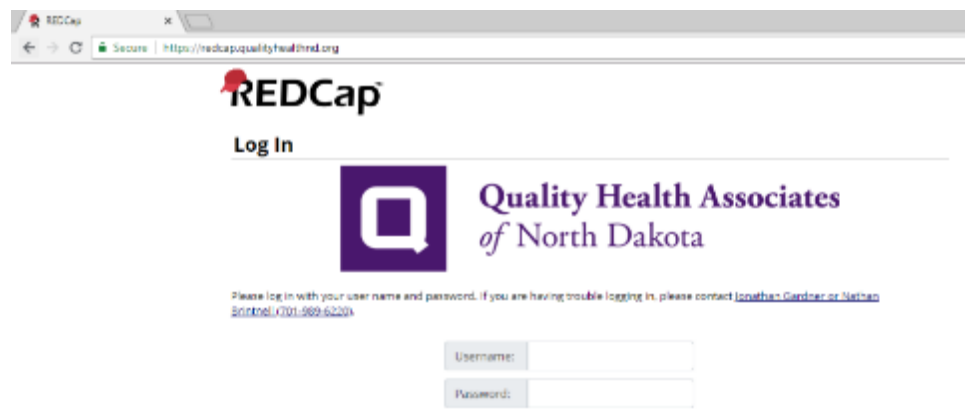

Figure 1- Login Screen

## Navigating REDCap

### Menu Bar Overview

Upon logging into the application, the menu bar at the top of the screen can be used to navigate between application features.

**My Projects** – [click](#) on this menu item to access the ONE Program data collection instruments.

**Help & FAQ** – this menu item has information primarily for software developers. You may not find the assistance you need here. Please use this manual or contact [support](#) for additional assistance.

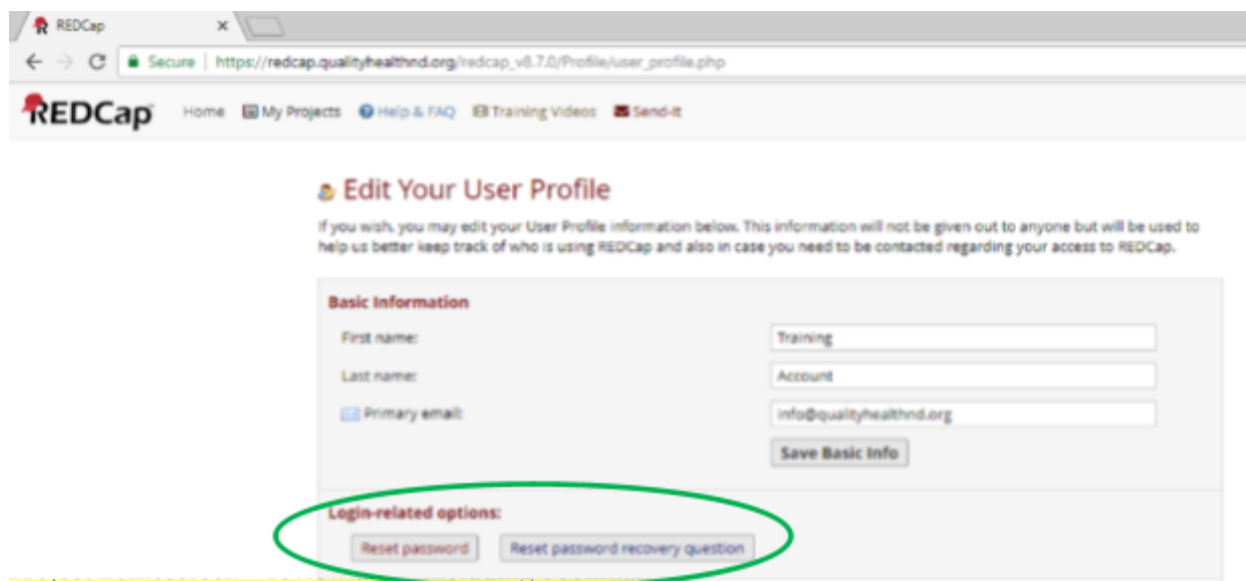

**Training Videos** - this menu item has information for software developers. You are unlikely to find any assistance here. Please use this manual or contact [support](#) for additional assistance.

**Send-It** – is a secure data transfer application that allows you to upload a file and allow multiple recipients to download the file in a secure manner. Each recipient will receive an email containing a unique download URL, along with a second follow-up email with the password (for greater security) for downloading the file. ONE Program project staff may use this feature to send secure files to your pharmacy.

**My Profile** – this menu item is used to update any account information and to reset your password

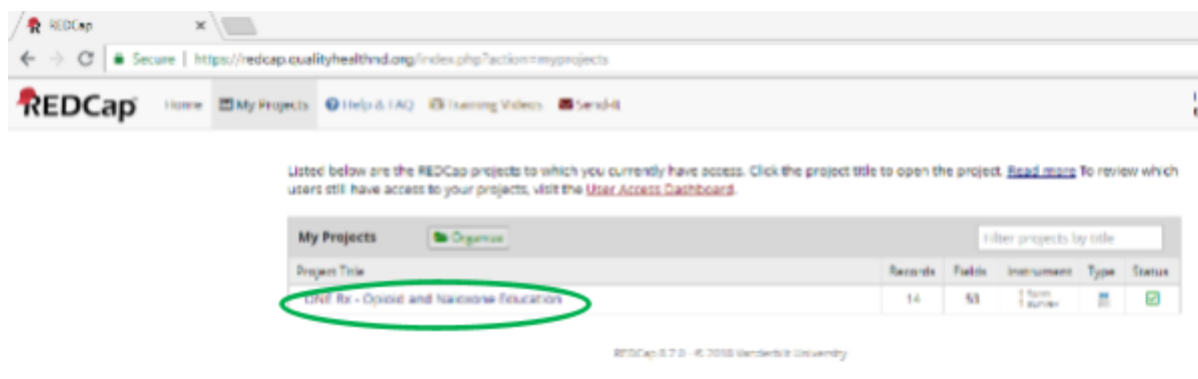

### My Profile

This is the location to reset your password and password recovery question. To do so, select My Profile from the Menu Bar. Under Login-related options, select reset password and follow directions to reset your password.

## My Projects

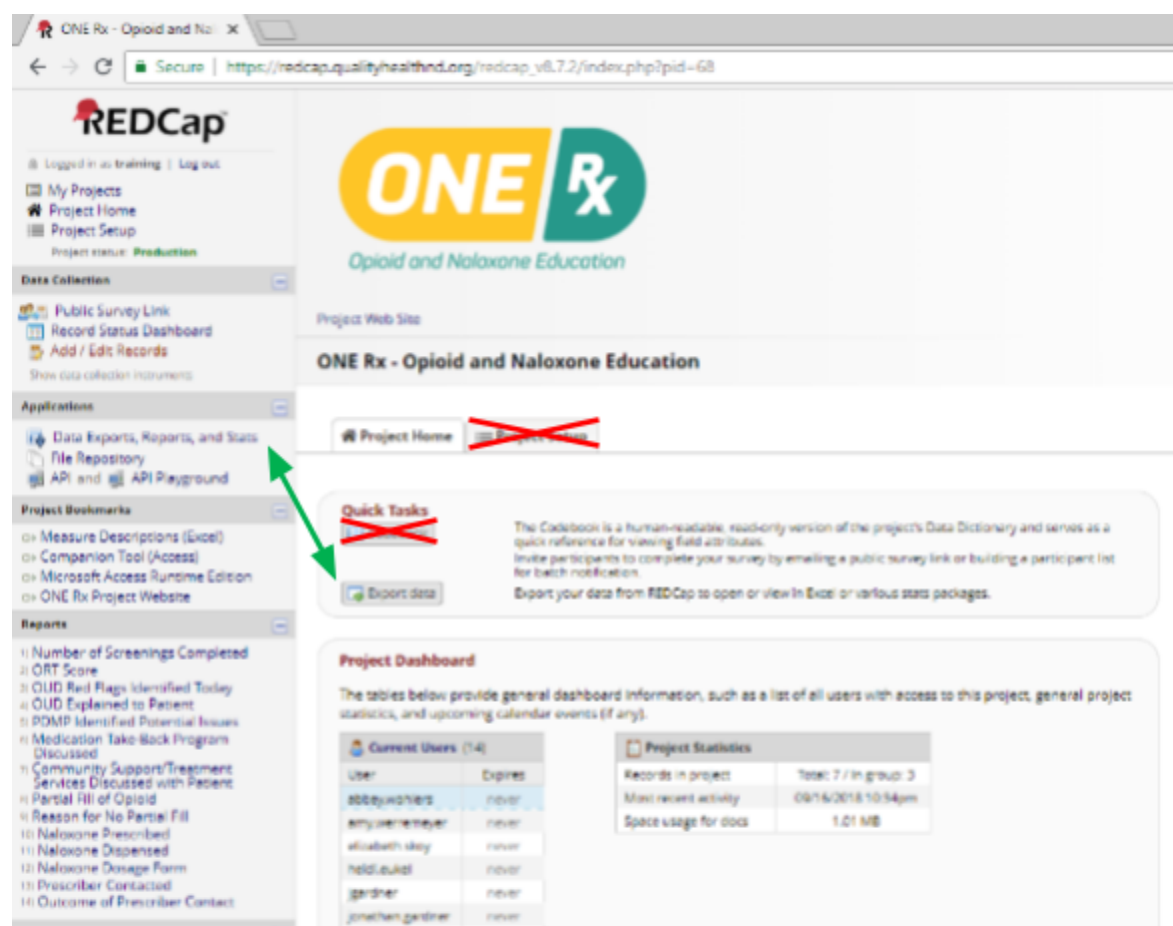

This Menu Bar item is used to access the ONE Program project to access resources, enter and view data, and view reporting specific to your pharmacy. From the My Project screen, simply click on “ONE Program – Opioid and Naloxone Education” to access the project. Once you access the project, you can return to the Menu Bar by clicking on the REDCap icon in the upper left-hand corner of the screen.

## ONE Program – Opioid and Naloxone Education Project Home

### Project Home Screen

There are many user features within REDCap projects. Not all features are needed by pharmacy users for the ONE Program project. Items with a **X** are features pharmacy users will not utilize. An overview of features is below.

Record status dashboard – one for ORT and one for outcomes worksheet

Figure SEQ Figure \\* ARABIC 5- Project Home Screen

### Quick Tasks

The Quick Tasks box at the top of the body of the home screen is a list of shortcuts for items available in the [Navigation Menu](#) on the left-hand of the screen. Green arrow indicates quick task location in the navigation menu.

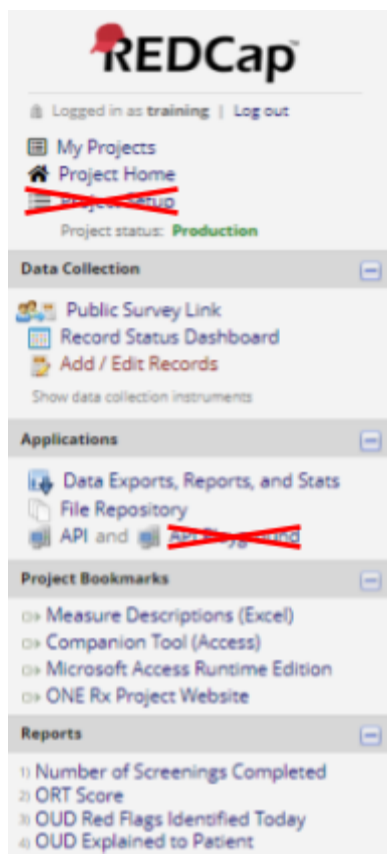

**Codebook** – this is for software developers and will not be needed by pharmacy users

**Export Data** – All ONE Program participants have access to pre-programmed [Reports](#) in REDCap and [Companion Tool](#) reporting through Microsoft Access. The pre-programmed reports in REDCap can be accessed through the Export Data quick task.

### Project Dashboard

The tables in the dashboard provide general information such as project statistics.

### Navigation Menu

The Navigation Menu runs along the left-hand side of the Project screens and contains all the tools users will use to complete ONE Program data collection and view results. An overview of tools is below.

**REDCap logo or My Projects** – will return you to application home screen with [Menu Bar](#) to view [My Profile](#) or use Send It.

**Project Home** – returns you to [Project Home Screen](#) from any open tools

**Project Setup** - this is for software developers and is not needed by pharmacy users

### Data Collection

**Public Survey Link** - this feature is used by pharmacies utilizing [Online Patient Intake Form](#) for data collection.

**Record Status Dashboard** – allows pharmacy users to view all Records (patient entries) in system and identify the status (complete, incomplete) of the [Patient Intake Form](#) and [Outcomes Worksheet](#).

**Add/Edit Records** – allows pharmacy users to enter new Patient Intake Forms and Outcome Worksheets or edit existing records. This tool will be most used by pharmacies utilizing [Paper Patient Intake Form](#) for data collection.

## Applications

**Data Exports, Reports, and Stats** – pharmacy users can review pre-programmed [Reports](#) in REDCap via this menu.

**File Repository** – this feature is used by developers and is not needed by pharmacy users

**API and API Playground** – API will be used to get key for the use with the Companion Tool. API Playground is for software developers and is not needed by pharmacy users.

**Project Bookmarks** – this section contains links to ONE Program project resources. Bookmarks include, but are not limited to:

- Companion Tool (Access) –links to a Microsoft Access file that allows for more detailed and customizable reporting. Computers that do not have Microsoft Access installed can use the Microsoft Access Runtime Edition bookmark to download a free version that will run all Companion Tool functionality.
- Microsoft Access Runtime Edition – link to download a free version that will run all Companion Tool functionality
- ONE Program Project Website – link to ONE Program project website with access to all program materials (training, documents, resources, etc)

**Reports** - pharmacy users can review pre-programmed [Reports](#) in REDCap via this menu.

**Help & Information** - You may not find the assistance you need here. Please use this manual or contact [support](#) for additional assistance.

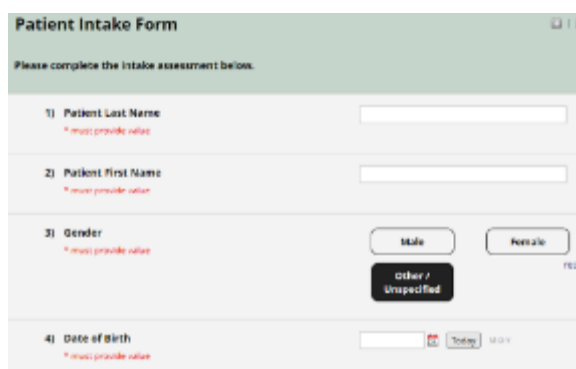

**Contact REDCap administrator** – use this link to create an email to send to [support](#) for additional assistance.

## Entering Data in REDCap

ONE Program has two data collection instruments, the [Patient Intake Form](#) (completed by patient) and the [Outcomes Worksheet](#) (completed by pharmacist). Your pharmacy has the option of allowing patients to complete the [Patient Intake Form online](#) (using their phone, other handheld device, or computer) or via [paper form](#) that pharmacy staff will later need to enter into REDCap. Pharmacy staff will also complete the [Outcomes Worksheet](#) within REDCap either online in real time or retrospectively using the [paper version](#). While your pharmacy can use whichever method is best incorporated into your existing workflows, the REDCap system is most efficient when data is collected online in real time.

### Online Patient Intake Form

Patients may complete the Patient Intake form online using their personal mobile device, a pharmacy tablet, or pharmacy computer. REDCap is

designed to make the survey entry user friendly, including mobile responsive formats.

## Mobile Device Set Up

For pharmacies that will have patients complete Patient Intake Form using QR codes or quicklinks. QR codes are read by the camera app on most mobile devices.

*To use a QR code:* Within the **Welcome Packet sent by NDSU** is a card with a QR code that can be used to have patients scan the code with their mobile device camera or QR reader app. This will redirect them to the Online Patient Intake Form which they can then complete on their mobile device.

To create additional images of the QR code:

1. Click on **Public Survey Link** via the Data Collection section of the Project Tools Menu.

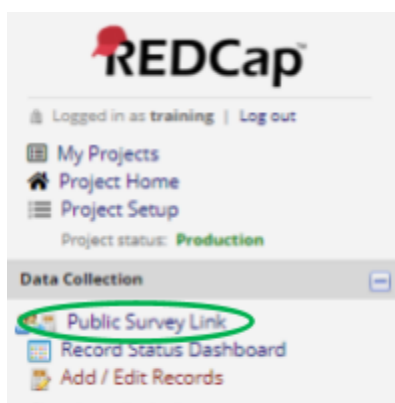

Figure 9- Public Survey Link

2. Right click on QR code to copy or save image, which can then be printed on a pharmacy printer

## Pharmacy Tablet Set Up

For pharmacies that will have patients complete Patient Intake Form using a pharmacy provided tablet.

1. On your tablet, login to <https://redcap.qualityhealthnd.org>
2. Click on **Public Survey Link** via the Data Collection section of the Project Tools Menu.

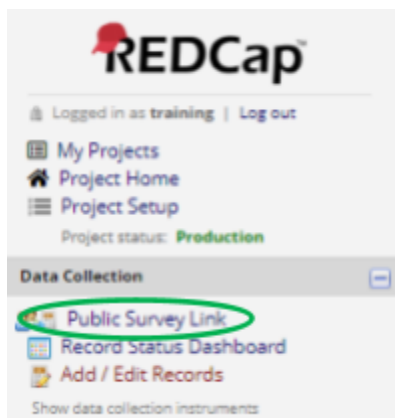

Figure SEQ Figure 1\* ARABIC 9-  
Public Survey Link

3. Click on the Direct Link right below the QR code
4. The Patient Intake Form will open in the browser on your tablet
5. Add the survey to your home screen (example image is from an iPad using Safari browser)

Figure 13- Add to Home Screen

Figure 12- Direct Link

6. An icon is created on the tablet home screen allowing for quick access to the Patient Intake Form

Figure 14- Tablet

## Pharmacy Computer Set Up

For pharmacies that will have patients complete Patient Intake Form using a patient accessible computer, such as computer in a consultation room.

1. Using the computer, follow Steps 1-3 in [Pharmacy Tablet Set Up](#)
2. The Patient Intake Form will open in the browser on your computer
3. Bookmark the link for quick access to the Patient Intake Form

## Online Outcomes Worksheet

Pharmacies that have patients complete the [Online Patient Intake Form](#) can view completed surveys and complete the Outcomes Worksheet in REDCap. REDCap will automatically score the ORT portion of the Patient Intake Form and identify red flags from the opioid overdose portion of the intake form.

1. Patient completed the [Online Patient Intake Form](#)
2. Click on [Record Status Dashboard](#) under Data Collection
3. The Record Status Dashboard will open. It is a table listing all existing records/responses and their status (completed, incomplete) for both the Patient Intake Form and the Outcomes Worksheet. You may click on any of the colored buttons in the table to view that record in a new tab.
4. The [Default dashboard](#) displays records in chronological order. Changing the dashboard display to [All Intake Forms](#) displays in reverse chronological order (newest first). This may be helpful for pharmacies using Online Patient Intake Form. The [New Intake Forms](#) displays only those records without a completed Outcomes Worksheet. In the example that follow, patients Jane Doe and PT have completed a Patient Intake Form but do not have completed Outcomes Worksheets.

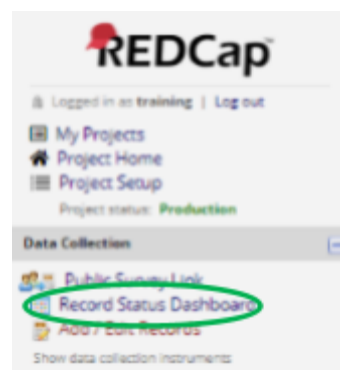

Figure 15- Record Status Dashboard link

ONE Rx - Opioid and Naloxone Education

**Record Status Dashboard (all records)**

Displayed below is a table listing all existing records/responses and their status for every data collection instrument (and if longitudinal, for every event). You may click any of the colored buttons in the table to open a new tab/window in your browser to view that record on that particular data collection instrument. Please note that if your formal user privileges are restricted for some data collection instrument, you will only be able to view those instruments, and if you belong to a Data Access Group, you will only be able to view records that belong to your group.

Dashboard displayed: **Default dashboard**

Displaying record: Page 1 of 1, 1 through 10641 records

Displaying: Instrument status only | [Link status only](#) | [All data rows](#)

Default dashboard displays records in chronological order. Changing the dashboard display to "All Intake Forms" displays in reverse chronological order (newest first). This may be helpful for pharmacies using Online Patient Intake Form. The "New Intake Forms" displays only those records without a completed Outcomes Worksheet

Outcomes Worksheet has not been completed

5. Click on the uncolored button under Outcomes Worksheet to open the incomplete Outcomes Worksheet.

- The **Outcomes Worksheet** will open. The top portion shows the results from the [Online Patient Intake Form](#). The Opioid Risk Tool (ORT) is automatically scored by REDCap and the risk level is displayed. Immediately below the ORT risk level are listed the accidental risk factors identified by the Patient Intake Form. Below the Patient Intake Form results, the Outcomes Worksheet items needing responses are displayed.

## Entering Patient Intake & Outcomes Worksheets Completed on Paper

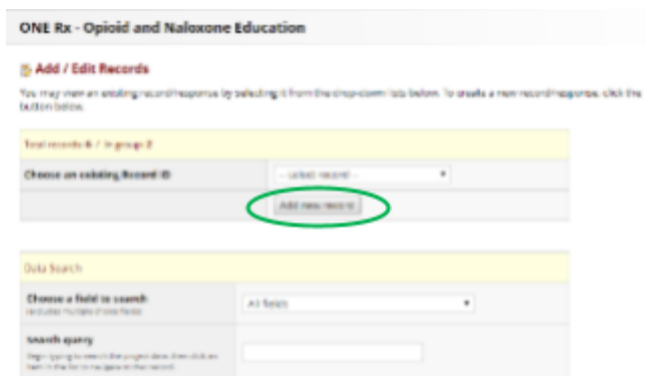

Pharmacies choosing to use paper-based Patient Intake Forms and Outcome Worksheets will need to retrospectively enter results into REDCap. REDCap is designed to mirror the paper forms allowing for user friendly transfer of information from paper to REDCap.

### Paper Survey Collection

- Have patient complete patient intake form available at:  
<https://www.nodakpharmacy.com/onerx/files/PatientIntakeForm.pdf>
- Score the patient intake form using the score sheet available here:  
<https://www.nodakpharmacy.com/onerx/files/ORTScoringSheet.pdf>
- Complete the Outcomes Worksheet available here:  
<https://www.nodakpharmacy.com/onerx/files/OutcomesWorksheet.pdf>

### Entering Paper Results into REDCap

- Go to **Add/Edit Records** under Data Collection
- Select **Add new record** in Add/Edit Records

**ONE Rx - Opioid and Naloxone Education**

**Add / Edit Records**

You may view an existing record/response by selecting it from the drop-down list below. To create a new record/response, click the button below.

Total records: 6 / 10 groups: 2

Choose an existing Record ID:

**Add new record**

**Data Search**

Choose a field to search:

Search query:

Clicking on a record in the project data view will open the form to edit that record.

Figure 20 - Add new record

- On the Record Home Page, select the button under Status for the Patient Intake Form

## Reporting

All ONE Program participants have access to pre-programmed **Reports** in REDCap and **Companion Tool** reporting through Microsoft Access. The pre-programmed reports in REDCap will be adequate for most users while those desiring additional measures and functionality will find that in the Companion Tool. REDCap Reports are accessible under the **Reports** section of the [Navigation Menu](#).

### REDCap Reports

The pre-programmed reports in REDCap provide aggregated results on a variety of measures. Clicking on the report will open a table containing all recorded responses.

## Companion Tool (Access) Reports

Users desiring additional data features, such as ability to filter by date, may utilize the [Companion Tool](#) which utilizes Microsoft Access. Computers that do not have licensed copy of Microsoft Access may utilize the Companion Tool by downloading and installing the free [Microsoft Access Runtime Edition](#).

### Installing Microsoft Access Runtime Edition (if Microsoft Access not installed on computer)

In the [Navigation Menu](#), click on Microsoft Access Runtime Edition located in [Project Bookmarks](#).

Follow the directions on the Microsoft website to download and install the Microsoft Access Runtime. You may need to contact your IT department to assist with installation.
